➤ Problem Statement

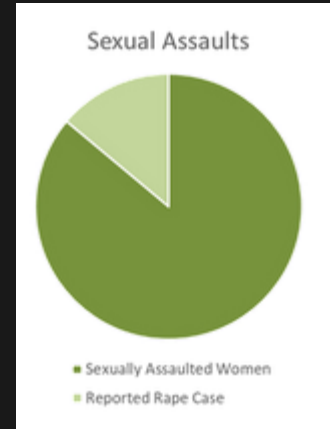

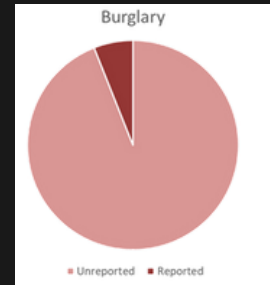

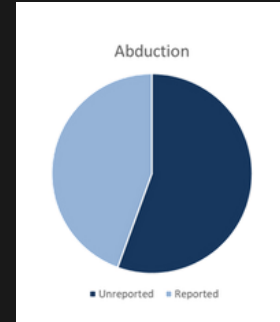

“Interactive map application for real time crime reporting.”

Need Statement

Crime reporting faces challenges of data privacy, user trust, data accuracy, technology integration, and security, in the face of high demand for real-time information and accountability.

Overview of Solution

An **interactive** platform for reporting and posting crimes of all levels/severity.

User(Witness/Victim) can report any crime with or without **revealing their identity/remaining anonymous**.

The administrator, police, and media houses have the authority to **endorse the crime** in the highlighted area

Lodged Complain is categorized as **severe, medium, or low**, using pictures, videos, or any other proof

The residents of the area are **immediately notified** of the news.

Drawbacks Of Existing Solutions

As of now India does not have a real-time crime reporting platform.

US-based Companies having the corresponding perception:

- Spot-Crime: With its purpose to provide nationwide crime information. It generally maps data for any police agency. Data mapped by SpotCrime is mainly sourced from police departments and news reports.
- LexisNexis Risk Solution: The purpose is to provide customers with solutions and decision tools that combine public and industry-specific content with advanced technology and analytics to assist them in evaluating and predicting risk and enhancing operational efficiency.

- This software will aid in the reduction of crime. It will assist in raising awareness about crimes occurring in the vicinity.
- This website will attempt to give honest, factual crime reports while also enabling individuals to feel at ease when reporting a crime. It will make it easier to keep track of reports and identifying fake reporters.

“Users can access real time updates and alerts for specific regions chosen by them. The administration has complete authority over the information”

--- USP (Unique Selling Point)

+ +

Commercialization

- The aggregated analytical data gathered by the platform will be marketed.
- Integration with the government and law enforcement systems is a prospect.
- The point-based incentive system created for the users, in which reporting real crime earns them points that can be exchanged for coupons from the companies who are sponsoring us.

+

+

5 Year Plan

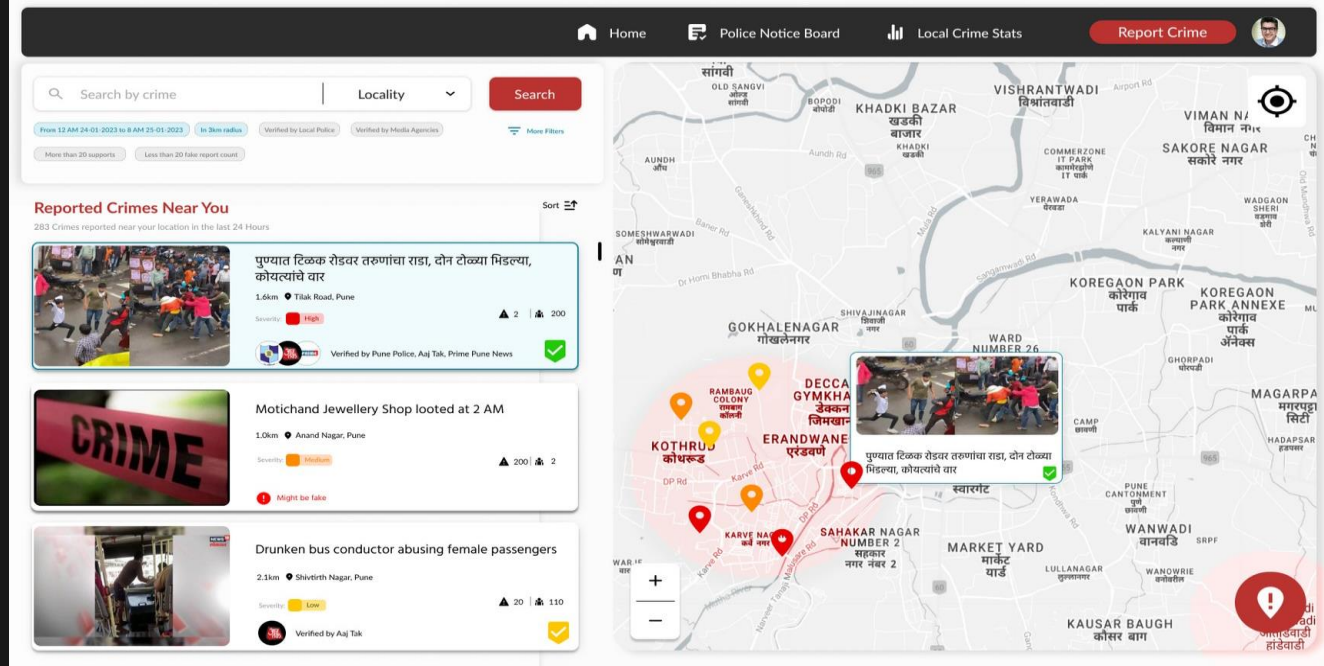

- In five years, we intend to build a large, verified database. That will be readily available.
- We aim for nationwide utilization of the website and police acknowledgment.
- We hope that the information we gather will be valuable to the police.
